Answer the following questions: Question 4(i). (i) Name the types of teeth seen in humans. Answer : Human teeth are of four kinds: Incisors are the four front teeth

at the middle of each jaw. They are chisel-shaped for biting and cutting. Canines are one on either side of the incisors in each jaw. They are pointed for tearing the food.

Human Digestive System Answers - Biology Is Fun

The digestive system of the human body is the sum of the gastrointestinal tract (GIT; also called alimentary canal) and accessory organs (tongue, liver, pancreas, etc.). These two parts together help in the digestion process. The alimentary canal is the long tube through which the food that we eat is passed.

Human Digestive System Parts, Functions and Organs

The digestive system is the organ system that breaks food down into small molecules that are absorbed into the bloodstream. Digestion is helped by enzymes, which are biological catalysts.

Human digestive system - Digestive system - KS3 Biology ...

The digestive system is an example of an organ system in which several organs work together to digest and absorb food. Digestion is a process in which relatively large, insoluble molecules in food (such as starch, proteins) are broken down into smaller, soluble molecules that can be absorbed into the bloodstream and delivered to cells in the body. These small soluble molecules (such as glucose and amino acids) are used either to provide cells with energy (via respiration), or with materials ...

Digestive System - Biology GCSE Revision

The colon receives mixed residues of food which have escaped digestion and absorption in the stomach and small intestine, i.e., undigested or indigestible food residues, whatever remains of digestive juices including large amount of H₂O and the fluid that has been swallowed or secreted and has escaped absorption in the small intestine in liquid form.

The Human Digestive System | AQA GCSE Biology Revision Notes

The digestive system, also known as “systema digestorium”, or the gastrointestinal system, is composed of the digestive tract organs plus the digestive adnexal

glands. The digestive tract is composed of the mouth, pharynx, esophagus, stomach, small intestine (duodenum, jejunum, ileum), large intestine (caecum, colon, rectum) and anus.
